

## **REQUEST FOR INFORMATION – STEPHEN SMITH**

**How much sales tax Sandy has received over the past three years (\$ and % of total) from just online sales.**

*In response to the question regarding online only sales tax, we are not able to give an accurate or complete answer. The data we receive from the State Tax Commission show online sales broken out for some retailers and not others. In addition, some retailers are not reporting online sales broken out to the State Tax Commission. That said, we do have data for some retailers and it shows a growing pattern, as expected. Here is the data we have, just keep in mind it is not complete:*

- 2 years ago – 5.31% or roughly \$1,000,000
- 1 year ago = 6.04% or roughly \$1,200,000
- Past 12 months = 7.36% or roughly \$1,500,000
